

Executive Sales & Business Performance Report

KPI Highlight Cards: Display top numbers directly in text/boxes:

Total Sales: ₹12.64M

Total Profit: ₹1.47M

Total Orders: 51K

Profit Margin: 11.62%

Executive Summary

Overall Financial Health: The business has generated ₹12.64M in Total Sales across 51K orders, realizing a Total Profit of ₹1.47M at a healthy baseline 11.62% Profit Margin. Performance is driven primarily by high-value technology sub-categories (Phones & Copiers) and strong core execution in the Central sales region. Strategic priority must focus on mitigating Q1 seasonal dips, improving low-margin Furniture sales, and deepening relationships with top enterprise clients.

Data Model Architecture (Star Schema)

4. Core DAX Calculations

// 1. Total Sales

Total Sales = SUM(Orders[sales])

// 2. Total Profit

Total Profit = SUM(Orders[profit])

// 3. Profit Margin

Profit Margin = DIVIDE([Total Profit], [Total Sales])

// 4. Total Orders

Total Orders = COUNTROWS(Orders)

// 5. Previous Month Sales

Previous Month Sales =

```
CALCULATE(
    [Total Sales],
    PREVIOUSMONTH(Calendar[Date])
)
```

// 6. Growth %

Growth % =

```
DIVIDE(  
    [Total Sales] - [Previous Month Sales],  
    [Previous Month Sales]  
)
```

// 7. Category Contribution %

Category Contribution % =

```
DIVIDE(  
    [Total Sales],  
    CALCULATE([Total Sales], ALL(products[category]))  
)
```

Strategic Insights & Business Storytelling

1. Is business growing consistently?

Analysis: No, business growth exhibits month-over-month volatility rather than steady, linear progression.

Details: The Total Sales by Month trend line indicates significant peaks and valleys throughout the multi-year timeline. While annual top-line revenue trends upward year-over-year (evident from individual annual slicer selections showing periodic revenue surges like ₹4.30M in peak years), monthly revenue fluctuates heavily due to demand spikes and seasonal purchasing behavior.

2. Which region is driving most revenue?

Analysis: The Central region is the primary revenue driver.

Details: According to the Total Sales by Region column chart, the Central region leads overall sales volume, followed closely by EMEA, South, and North. The drop-off in tail regions (e.g., Africa, Canada, Caribbean) indicates heavily centralized market demand that dominates overall company performance.

3. Which category has highest margin?

Analysis: Technology generates the highest absolute profit and operating margin.

Details: As displayed in the Total Profit by Category bar chart, Technology leads total profitability across all product divisions. Office Supplies maintains a stable second position with strong volume, whereas Furniture delivers the lowest relative profit margin despite generating significant gross revenue.

4. Are there seasonal trends?

Analysis: Yes, distinct quarter-end and year-end seasonality patterns exist.

Details: The Total Sales by Month line chart demonstrates recurring cyclical spikes, specifically in Q3 and Q4 (September to December), aligned with corporate budget spending cycles and holiday demand. Conversely, Q1 (January through March) consistently experiences a post-holiday drop in order volume and sales revenue.

5. Which customer segment (or sub-category) is most valuable?

Analysis: Phones, Copiers, and Chairs are the top-performing sub-categories driving enterprise value.

Details: The Total Sales by Sub-Category donut chart highlights Phones (~13.3% share / ₹1.71M), Copiers (~11.94% share / ₹1.51M), and Chairs (~11.89% share / ₹1.50M) as the three largest revenue drivers. From a customer portfolio standpoint, top enterprise accounts like Bart Watters (₹32.8K) and Christopher Conant (₹35.1K) generate disproportionately high order values.

6. Where should management focus?

Management should execute a 3-point strategic plan:

Optimize Furniture Profit Margins: Re-evaluate supplier contracts and logistics costs for the Furniture category to improve its profitability margin closer to Technology's performance standard.

Expand Underperforming Regions: Reallocate marketing budget to mid-tier geographic regions (e.g., Africa, Canada) to diversify revenue away from over-reliance on the Central region.

Enterprise Key Account Retention: Establish dedicated account management for the Top 10 Customers who drive high average order values and consistent recurring sales volume.
